STAR®

BUILDINGS

Founded in 1927, Star is a leader in the building systems industry. Star's roof, wall, frames, accessories, and coatings are the result of product development and engineering innovations that have proven themselves in over 350,000 structures world wide.

Star offers distinct advantages of design flexibility that easily conform to your corporate image, and the assurance of consistent appearance from site to site.

Star's builder network of over 950 builders and our systems engineering approach provide you with shared know-how and commitment to excellence in design and construction.

Star Building Systems has served hundreds of the leading companies in the United States and in Canada. Our team approach recognizes the special needs of on-time construction within budget constraints that large, regional and national companies often face.

Our team will customize a design-build program to meet any project requirement, from site selection, to completed facilities.

Star's wide selection of building styles is suitable for projects ranging from commercial retail to heavy industrial projects. All engineering is done by Professional Engineers who are licensed to practice in all states and several provinces in Canada.

Star's credentials also include the stringent approvals of the American Institute of Steel Construction (AISC); Factory Mutual Approval; Underwriters Laboratories, Inc.; U.S. Army Corps of Engineers; and the Canadian Welding Bureau. We can provide a complete list of our credentials.

Star's state-of-the-art plants are strategically located across the United States, and produce a completely integrated product line.

Each component is inspected throughout the manufacturing process to assure that the highest standards of quality are kept.

Our plants are designed for maximum operating efficiency and record the lowest man/hours per ton in the industry. This means the very best value for your money.

With Star, you get the quality and design flexibility you expect, allowing your specifications to be easily applied to your structure, while keeping your future expansion needs in mind.

Star can show you how to get the very best value for your money. We are committed to designing and manufacturing superior buildings for our customers. Contact Star Building Systems today. We can help you with your construction needs while you focus on growing your business.
