

At Star, we know what it takes to manufacture superior metal buildings for our customers.

Our team knows the detail and steps that go into giving them the best building to fit our customers needs.

Star has representation in Canada and world-wide.

And, over 800 builders strategically located across the United States agree:

"I'm glad I chose Star."

SEE THE DIFFERENCES OF STAR

Quality, Reliability, and Innovation. Explore the endless design possibilities and distinct differences a Star Building System will make.

There's little pretense with Star Building Systems. Our values are what you value. And, you can rely on Star for ensuring your building will reflect success, and will meet and exceed your expectations.

Founded in 1927, Star is a leader in the building systems industry, and is of the highest quality. Star's roof, wall, frames, accessories, and the coatings are the result of product development and engineering innovations that have proven themselves in over 250,000 structures world-wide.

Star offers distinct advantages of design flexibility that easily conform to your corporate image, and the assurance of consistent appearance from site to site.

Star recognizes the special needs of on-time construction within budget constraints that large, regional and national companies often face. Star has developed a Corporate Accounts Program uniting Star's team and our systems engineering approach with the Star builder network of over 800 builders.

Star's sound builder network provides you with shared know-how and commitment to excellence in design and construction. You can focus on your business while our team focuses on your construction requirements.

You can have the peace of mind that the Star Builder is well known in his market by city officials, local building professionals, and has a proven track record. They know all the local codes.

Using a team approach, Star will customize a design-build program to meet any project requirement, from site selection, to completed facilities.

The engineering for Star Buildings is by Professional Engineers licensed to practice in all states and several provinces in Canada.

Star's credentials also include the stringent approvals of the American Institute of Steel Construction(AISC), Factory Mutual Approval, Underwriters Laboratories, Inc., U. S. Army Corps of Engineers, and the Canadian Welding Bureau. We can provide you with a complete list of our credentials.

Star's state-of-the-art plants are strategically located across the United States, and produce a completely integrated product line. Each component is inspected throughout the manufacturing process to assure the highest standards of quality are maintained. Our plants are designed for maximum operating efficiency. This means the very best value for your money.

With Star, you get the quality you want. You get the versatility of our design flexibility, allowing your specifications to be easily applied to your structure, while keeping your future expansion needs in mind.

With Star Building Systems, you save time, money, and business energy.

“Metal building construction is my business. Partnering with Star allows me to focus on what I do best.”

Manufacturing & Warehouse Facilities

Manufacturing and product warehousing have become a high-tech undertaking regarding space, maintenance costs, durability, and expansion considerations.

Star has the technical capability to meet tough building challenges. Interiors with wide open spaces, unusual ceiling heights and extreme load requirements are computer engineered to your exact needs.

Mezzanines for offices, raised floor areas for computer centers, and cranes of all sizes and expanses are commonly used features that are incorporated into Star Building systems for revenue producing space.

Recreational Facilities

Space, maintenance, durability, speed of erection, and cost concerns make Star the perfect solution for any recreational project.

Column-free interiors provide high ceilings and uninterrupted floor space to fit your exact requirements. Ample space is allotted for basketball courts, swimming pools, skating rinks, recreation centers, bowling alleys and riding arenas.

Mezzanines can be added for office areas, storage space, training rooms, or indoor running tracks. Multi-story structures are available up to 3 stories tall to maximize savings in building costs and land usage.

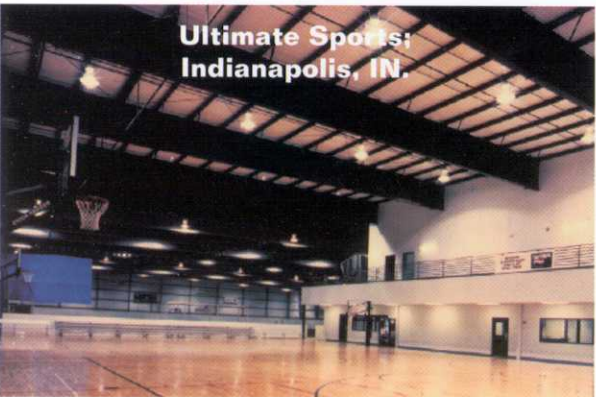

A Star Building system offers creative solutions to the diverse requirements of recreation facilities. Choose Star as your number one building partner and enjoy the success of your facility for many years!

BUILT TO YOUR HIGH STANDARDS

Aviation Facilities

Star's systems versatility is exemplified through aviation construction.

Your aviation facility can be designed to meet your exact specifications. Column-free interiors provide wide floor space, and high eave heights accommodate even the largest airplanes.

Star Building Systems can accommodate your choice of doors, whether bottom rolling, bi-parting, bi-fold, or a stacked leaf arrangement.

Aviation facilities are widely diverse in size and design. Star has the know-how to meet your building challenges with over 75 years of building experience.

When it comes to designing and building your new aviation facility, choose Star for unparalleled advantages.

Auto Dealerships

Automobile dealerships present unique challenges in the marketplace. A Star Building System provides cost effective and aesthetically appealing solutions to the challenges.

Your dealership can be designed with high ceilings or with a column-free interior, providing you with wide, clear floor space for maximum showroom and shop requirements.

Star Building Systems are compatible with any conventional exterior and provide energy efficiency and lower maintenance costs.

Star uses state-of-the-art computer aided engineering and drafting with advanced manufacturing technology. That puts you into business faster and generates quicker income.
