A Star Building System is compatible with any conventional exterior...

Double C Bar Ranch
Kenansville, Florida
H & L Builders, Inc., Builder

A working farm or ranch is a serious business and you need structures that can meet the challenge. That's why Star Building Systems, a leader in the custom metal buildings industry, provides quality metal buildings that are designed and built to handle all of your farm and agricultural needs.

Star buildings can be used for horse barns, stables, arenas, feedlots, dairy and calving barns, equipment and storage barns, hay barns, and the list goes on.

Each Star building is individually designed and engineered to meet your exact requirements as well as local building codes. Column-free interiors can provide uninterrupted floor space. High ceilings help promote proper ventilation. Cupolas and dormers open the facility up to more natural light and help create a stylish design. Lofts can be added for additional storage space.

Your Star building can be customized to fit your special needs. Floors can be dirt, gravel, asphalt, concrete, brick, rubber brick or mats. Special drainage requirements can be met. Large, clear-span interiors provide floor space that can include cubicles or stalls with brisket board and neck rails. Recessed spaces in the aisles for water faucets, an easy to clean wall finish, maximum roof lighting, and the inclusion of a high pressure wash down system are all features that a Star building can easily accommodate.

Future maintenance and energy cost considerations are a major concern and they receive major attention. Performance-proven quality materials used in manufacturing insure savings on future upkeep and maintenance. A Star building offers optimal efficiency and is termite and fire resistant. When it's time to expand, Star can provide the answers. Star building systems provide the flexibility to add on in an easy and attractive way.
