

STAR BUILDINGS INTRODUCES THE PATENTED
LONG BAY[®]
STEEL ROOF FRAMING SYSTEM

The new Long Bay[®] System is the first innovative steel roof framing product in over 30 years. This new system allows Star Buildings builders to compete in the conventional and tilt wall markets. With the Long Bay System (LBS), fewer interior columns provide for large areas of open floor space. Star's LBS is perfect for manufacturing, warehouse/distribution, and large retail applications. The strong, lightweight framing system provides the inherent benefits of a metal building option that is superior to conventional methods.

Star prides itself on offering the following features for all Long Bay Systems:

- Aesthetically pleasing appearance
- Standard & custom design options
- Fast & economical construction
- Ease of expansion
- Ongoing durability
- Reduced maintenance costs
- Long-term energy savings

Long Bay[®] System

Fewer interior columns provide for large areas of open floor space. Star's Long Bay System is perfect for manufacturing, warehouse/distribution, and large retail applications. The strong, lightweight framing system provides the inherent benefits of a metal building option that is superior to conventional methods.

- Bay spacing up to 65 feet
- Lighter and stiffer than conventional products
- Available with a standing seam metal roof or with B Deck for Built-up or Single Ply roof
- Bolted connection to main frame
- Faster, safer and more economical erection
- Uses less bridging than joists
