Top Running Crane on Crane Bracket
At Interior Frame Column

See PF07006B for required Crane Beam Tie-Back to Column. (Tie-Back Angle shown)

For Interior Frame Column with Cranes on each side of the Column the Crane Angle Brace will bolt at the center of the Column.

A325 Bolts provided when Crane Beam is provided by Building Manufacturer. If Crane Beam is not provided the holes in the Crane Bracket will not be provided except on request.

See PF07001 for Notes, Materials and additional Information.
